(ACHE/Fin-Fan)

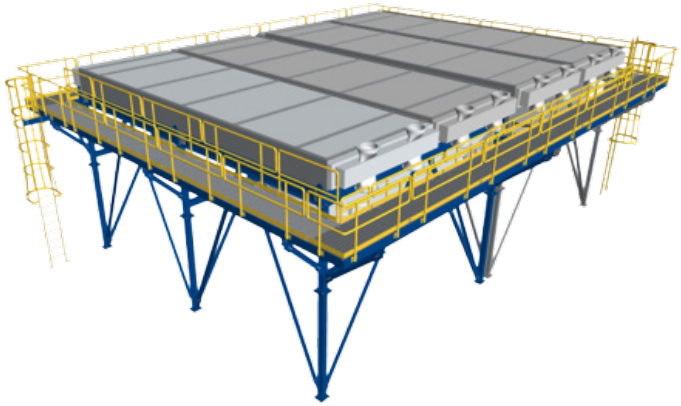

Air-Cooled Heat Exchangers

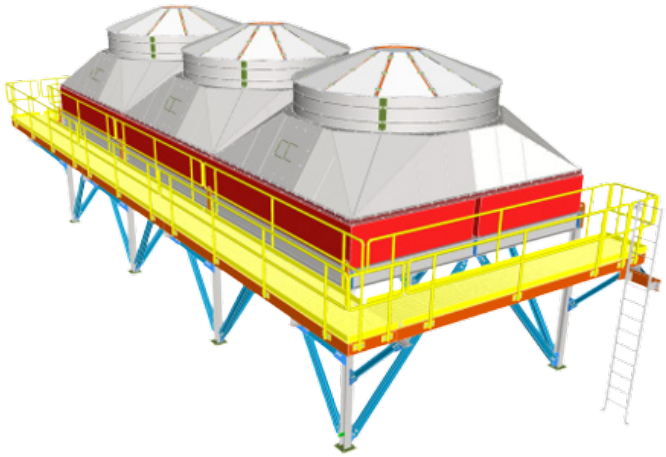

PRODUCT

ICT Industrial provides engineering, fabrication, installation, and commissioning for **Air-Cooled Heat Exchangers** (**ACHEs / Fin Fans**). Our integrated delivery model combines in-house engineering, flexible manufacturing, and field execution across North America. With a single point of accountability from concept through startup, we reduce interface risk and streamline project delivery.

MODELS

Design and supply of both forced-draft and induced-draft ACHE configurations.

WHAT WE DELIVER

- **Engineering:** In-house thermal, mechanical, and structural design, including code documentation
- **Fabrication Flexibility:** Domestic or international manufacturing, aligned with budget and schedule
- **Complete Scope:** Self-performed installation of pipe headers and risers, expansion tanks, structural steel, insulation, grouting, electrical, and instrumentation
- **Lifecycle Support:** Installation, commissioning, startup assistance, and long-term maintenance
